Professional Profile

AI automation and full-stack engineer building production systems for remote Australian businesses: agentic AI orchestration, LLM-driven voice and IVR navigation, self-healing monitoring agents, n8n and GoHighLevel workflows, CRM integrations, APIs, and internal business platforms. Uses Claude Code for AI-assisted implementation, testing, troubleshooting, and documentation while retaining responsibility for code review and deployment. Works from discovery through deployment, with documented, testable workflows and human approval gates on automated actions.

Technical Capabilities

- **AI:** Claude Code, agentic orchestration, LLM integration, AI agents, RAG, MCP, prompt workflows, human approval gates
- **Automation:** n8n, GoHighLevel, Make.com, webhooks, scheduled jobs, CRM workflows, lead lifecycle
- **Frontend:** React, TypeScript (2 years), Next.js, Vue, JavaScript, Tailwind CSS, accessibility
- **Backend:** Python, Django, FastAPI, GraphQL, Node.js, Express, PHP, Laravel, CodeIgniter
- **Data:** Supabase, PostgreSQL, PostGIS, MySQL, SQLite, Redis
- **Integrations:** Xero, Twilio, REX CRM, Pipedrive, Microsoft Graph, AWS S3, Odoo
- **Delivery:** AI-assisted development, GitHub, CI/CD, browser testing, API testing, documentation, runbooks

Professional Experience

Envision Floor Carpet (Australia) — AI Engineer (Remote) | October 2024–Present

- Built an internal order management system for the business.
- Built an onsite (job-site) management system for field operations.
- Integrated invoicing through Xero.
- Designed agentic AI orchestration for business workflows.

Freelance (ALTO Property, Bricklane Property Group, FlowHive, Skin Essentials by Her) — Full-Stack & Automation Developer | January 2024–Present

- ALTO Property: own and improve a production Next.js, React, TypeScript, and Supabase property platform covering listings, enquiries, CRM, REX, telephony, analytics, communications, and staff workflows.
- Bricklane Property Group (from January 2026): build and maintain a Vue 3 and CodeIgniter 4 property website with appraisal and enquiry journeys, CRM lead handoff, analytics, SEO, accessibility, and browser regression checks.
- Build GoHighLevel, n8n, and Make.com automations for enquiry, CRM, lead, and communication processes (ALTO Property, Skin Essentials by Her).
- FlowHive: build web platforms, internal tools, CRM workflows, AI integrations, and operational automation with documentation and handover materials.

Tiongsons — Operations Manager / Founder | March 2022–December 2024

- Managed manufacturing operations, team coordination, supplier relationships, and client escalations.
- Built internal systems for quotations, costing, bills of materials, cut lists, production, inventory, accounting, and CRM.
- Implemented Odoo ERP and used operational automation to reduce duplicated work and pricing risk.
- Wrote Python parametric modeling scripts for Mozaik and Cabinet Vision so cabinet parts, dimensions and adjustments update automatically across 2D and 3D CAD and CNC manufacturing outputs.

Selected AI Systems

AI IVR Navigation System

AI agent that actively listens to live IVR audio and navigates phone menus automatically. Built around real-time testing and repeated iteration to train the engine on each IVR map.

Self-Healing Log Agents

Agents that monitor application logs and act on detected issues to keep systems running.

Outreach-Scoring Agent

Agent that scores outreach to help prioritise follow-up.

Agentic Business Orchestration (Envision Floor Carpet)

Agentic AI orchestration for business workflows, built alongside the internal order management system, onsite management system, and Xero invoicing integration.

Selected Project Delivery

Manufacturing Estimating & Quotation Platform

Inventory, suppliers, costing, cut lists, margin, 3D configuration, RFQs, quotations, PDF output, and multicurrency workflows. React, TypeScript, CodeIgniter, MySQL, React Three Fiber, and AI services.

AI QA Operations Workspace

Tenant-isolated quality workspace for rubric-led reviews, transcripts, live transcription, AI scorecards, knowledge retrieval, and guarded AI actions. Next.js, Supabase, OpenAI, and Gemini.

Campaign Field Operations Platform

Offline-capable PWA for surveys, form building, household mapping, team activity, phone/SMS workflows, events, and reporting. React 19, FastAPI, PostGIS, and Redis.

Earlier Career

Real-Time Analyst, Virgin Australia account, Sitel Group (2019–2022); Fraud Analyst, Target account, Result CX (2016–2017); Customer Service / Technical Support, Concentrix (2015–2016); Technical Support Representative, SPI Global II (2014–2015).

Education

Undergraduate coursework, Computer and Information Sciences

Technological Institute of the Philippines | 2010–2013
